PROFESSIONAL SUMMARY

U.S. Army Veteran and Computer Science student with a 4.0 GPA and an Associate of Science in Information Technology. Hands-on experience with C++, Python, SQL, Linux, Git/GitHub, Docker, and object-oriented programming through academic and personal projects. Experienced in debugging, testing, version control, and building practical software solutions.

TECHNICAL SKILLS

Programming: C++, Python, SQL, Bash/Shell, HTML/CSS, PHP, JavaScript basics

Tools & Environments: Visual Studio, Git, GitHub, Docker, Linux/Unix, AWS EC2, Virtualization

Development: OOP, Classes & Objects, Functions, Loops, Data Structures, Algorithms, Input Validation, Debugging, Unit Testing, Branches, Pull Requests

Web & Backend: Astro, Flask, Django, REST APIs, Nginx, Apache, MariaDB/MySQL, MS SQL Server

PROJECTS

Into the Unknown - C++ Console Adventure Game | C++, OOP, Visual Studio, Git/GitHub

- Built an interactive console adventure with menus, randomized travel, inventory/item collection, player status, and game-state logic.
- Applied classes and objects, functions, loops, input validation, debugging, GitHub issues, commits, branches, pull requests, documentation, and usability testing.

WilsonBlog - Personal Blog Website | Astro, TypeScript, HTML/CSS, Git/GitHub

- Built and maintained a content-driven blog with reusable layouts/components, post metadata, tags, category pages, and comments.
- Worked with site configuration, styling, content structure, Git/GitHub workflows, deployment configuration, debugging, and ongoing refinement.

Enterprise Systems & Architecture Simulation | Systems Engineering & Governance

- Designed high-availability infrastructure with RBAC and network security policies; documented service-level criteria, incident-response workflows, and root-cause processes.

EDUCATION

B.S. Computer Science (AI Concentration) - Full Sail University | Expected March 2028

Academic Focus: Data Structures, Algorithms, AI Systems | Member: National Society of Collegiate Scholars (NSCS)

A.S. Information Technology - Full Sail University | GPA: 4.0 / 4.0 (2025)

Relevant Coursework: Scripting & Automation, Database Systems, Cloud Computing, Virtualization, OS Architecture

MILITARY EXPERIENCE & TRAINING

U.S. Army Veteran - Tracked Vehicle Mechanic (91H) & Petroleum Specialist (92F)

- Managed \$1M+ inventory accountability and performed technical diagnostic troubleshooting under mission-critical constraints and strict safety requirements.

Information Technology Specialist - MedCertify: 24-week curriculum covering operating systems, networking, hardware, and security.

Additional Technical Coursework: Python Application Logic, Linux CLI & Automation, DevOps Foundations (Docker & Kubernetes).
