

HEATHER BRADEN-WILSON

COMPUTER SCIENCE STUDENT | SOFTWARE DEVELOPER

El Paso, TX | 915-242-7982 | heatherbradenwilson@gmail.com

Portfolio: heatherbwilsonbtw.github.io | GitHub: github.com/HeatherBWilsonBTW | LinkedIn: linkedin.com/in/hbraden-wilson

PROFESSIONAL SUMMARY

U.S. Army Veteran and Computer Science student with a 4.0 GPA and an Associate of Science in Information Technology. Builds C++ and web applications through academic and personal projects, with hands-on experience in object-oriented design, debugging, testing, Git/GitHub workflows, Linux, SQL, and Docker. Brings a technical troubleshooting background and a practical, methodical approach to finding problems and improving software.

TECHNICAL SKILLS

Languages: C++, Python, SQL, Bash/Shell, HTML/CSS, JavaScript basics

Web & Backend: Astro, Flask, Django, Nginx, Apache, MariaDB/MySQL, MS SQL Server

Tools & Environments: Visual Studio, Git, GitHub, Docker, Linux/Unix, AWS EC2, Virtualization

Development: Object-Oriented Programming, Data Structures & Algorithms, Input Validation, Debugging, Unit Testing, Version Control, Branches, Pull Requests

TECHNICAL PROJECTS

Into the Unknown - C++ Console Adventure Game | C++, OOP, Visual Studio, Git/GitHub

- Built an interactive console adventure with menu-driven navigation, randomized travel, inventory and item collection, player status, and persistent game-state logic.
- Organized the program with classes, functions, loops, and input validation; tested and debugged edge cases while refining prompts and gameplay through iterative development.
- Managed the project in GitHub with issues, milestones, meaningful commits, branches, pull requests, and Markdown documentation.

WilsonBlog - Content-Driven Personal Blog | Astro, TypeScript, HTML/CSS, Git/GitHub

- Built and maintain a responsive content-driven website using reusable layouts and components, Markdown posts, metadata, category organization, navigation, and comments.
- Configured the content-management and deployment workflow, worked through authentication and site configuration issues, and used Git/GitHub to track changes and ongoing refinements.

Enterprise Systems & Architecture Simulation | Systems Engineering & Governance

- Designed a high-availability infrastructure architecture with role-based access control and network security policies, then documented service-level criteria, incident-response paths, and root-cause workflows.

EDUCATION

Bachelor of Science in Computer Science (AI Concentration) - Full Sail University | Expected March 2028

Academic Focus: Data Structures, Algorithms, AI Systems | Member: National Society of Collegiate Scholars (NSCS)

Associate of Science in Information Technology - Full Sail University | GPA: 4.0 / 4.0 (2025)

Relevant Coursework: Scripting & Automation, Database Systems, Cloud Computing, Virtualization, OS Architecture

MILITARY EXPERIENCE & TECHNICAL TRAINING

U.S. Army Veteran - Tracked Vehicle Mechanic (91H) & Petroleum Specialist (92F)

- Diagnosed equipment problems, followed detailed technical procedures, and performed troubleshooting in mission-critical environments where accuracy, safety, and documentation mattered.
- Managed \$1M+ in accountable inventory and maintained detailed records while working across teams under time-sensitive operational requirements.

Information Technology Specialist - MedCertify: 24-week curriculum covering operating systems, networking, hardware, and security.

Additional Technical Coursework: Python Application Logic, Linux CLI & Automation, DevOps Foundations (Docker & Kubernetes).
